

SCHEDULE A
SUMMARY OF FILINGS RECEIVED

Description	CanPX (Fixed Income)	Gmarkets (Fixed Income)	TSX/CanDeal (Fixed Income)	MX (Equity and Fixed Income)	CDS Inc. (Equity and Fixed Income)	TSX (Equity)
1. ORGANIZATION AND GOVERNANCE						
1. Overview	CanPX is a for-profit, privately-held corporation.	Gmarkets is a for-profit, privately-held corporation.	<p>The application is made jointly by TSX and CanDeal.</p> <p>The vehicle pursuant to which TSX/CanDeal will deliver the functions of the IP (and consequently, the governance structure for the IP) has not been finalized at this time. TSX/CanDeal anticipate that the structure will facilitate the involvement of, and input from, various industry participants including those who are independent of TSX/CanDeal.</p>	<p>MX is a for-profit, privately-held corporation.</p> <p>It proposes two alternative structures for the information processor:</p> <p>1. The CSA could form a not-for-profit legal entity which would carry on its activities as an IP. The IP would:</p> <ul style="list-style-type: none"> • contract with MX to provide the technical service through its Information Technology Solutions business unit (MX-ITS); and • establish Policy and Technical Committees comprised of industry 	The IP services would be provided by CDS Inc., a wholly-owned subsidiary of The Canadian Depository for Securities Limited.	TSX Inc. (TSX) is a for-profit corporation and a wholly-owned subsidiary of TSX Group Inc., a public company.

Description	CanPX (Fixed Income)	Gmarkets (Fixed Income)	TSX/CanDeal (Fixed Income)	MX (Equity and Fixed Income)	CDS Inc. (Equity and Fixed Income)	TSX (Equity)
				<p>volunteers for each market (equity and debt) that would make all policy decisions applicable to the IP, as well as decisions on fees and revenue sharing.</p> <p>2. MX could take on direct responsibility to operate as an IP and could establish a separate entity with an independent governance for this purpose.</p>		
2. Board of Directors¹	The board of directors of CanPX is composed of eight directors. All are related to dealers or IDBs.	There are three shareholders, two of which are also directors of Gmarkets. While no directors are independent of the applicant, they have	The governance model for the vehicle has not yet been finalized. TSX/CanDeal anticipate facilitating the involvement of, and input	The composition of the Board will be determined once the optimal governance structure to perform the IP role has been determined between	The Canadian Depository for Securities Limited has a board of 15 directors; currently, 4 of these directors are independent.	The TSX board of directors has 14 directors, 12 of which are independent.

¹ For the purposes of this summary, we interpreted independence broadly to mean the lack of a direct or indirect material relationship with an applicant; a material relationship would be reasonably expected to interfere with the exercise of a director's independent judgement.

Description	CanPX (Fixed Income)	Gmarkets (Fixed Income)	TSX/CanDeal (Fixed Income)	MX (Equity and Fixed Income)	CDS Inc. (Equity and Fixed Income)	TSX (Equity)
	<p>markets, CanPX has a number of measures to help preserve independence, as follows:</p> <ul style="list-style-type: none"> • Broad share ownership with provision for others to become shareholders; • Secretariat services provided by a third party (the IIAC); • Declaration by directors of any known conflicts of interest during Board meetings; • Periodic guest participation of a Bank of Canada representative; • Shareholders do not acquire data directly from CanPX but from CanPX vendors at the 	<p>markets, as it does not derive any income from trading in these markets, and none of its shareholders and directors are employed by a Canadian marketplace, dealer or IDB.</p>	<p>manage potential conflicts of interest associated with the receipt of data from competitors of TSX or CanDeal. As a general matter, access to data will be on an “as needed” basis. Specifically:</p> <ul style="list-style-type: none"> • Employees of Shorcan Brokers Limited (an IDB subsidiary of TSX) will not be granted access by TSX/CanDeal to competitor IDB data; • Employees of CanDeal’s Revolution Trading division will not be granted access by TSX/CanDeal to competitor IDB data; and • Access to the contributed inbound 	<p>exchange shares. Such conflicts are managed through restrictions on share ownership.</p> <p>In addition, the technical infrastructure for the consolidated data feeds will be separate from the MX infrastructure. Operational processes are automated, and only operational staff specifically required to maintain the service will be authorized to access the applications.</p> <p>The reception, processing and dissemination of the data takes only a fraction of a second, therefore, potential conflicts of interest from human manipulation is virtually</p>	<p>of such data.</p> <p>However, it has processes to manage potential conflicts of interest that it would face as an IP, due to receipt of data from competitors of its shareholders. For example, data received by CDS Inc. in its capacity as an IP will not be made available to its Board of Directors (or the Board of its parent, CDS Limited). New service strategy papers and business cases are reviewed and approved by the Board of Directors. Similarly, status reports on various lines of business are presented to the Board of Directors from time to time for review and</p>	<p>modified, except to reformat it if required, to remove unnecessary data elements and add necessary new data elements. TSX staff who do not require knowledge of or access to competitor data or client information for purposes of operating the IP or carrying out TSX processes will not have access to the data or client information.</p> <p>TSX is able to bill and collect other marketplace fees or coordinate appropriate direct billing administration with them. In the latter case, as an additional control, vendors must report the numbers that access to marketplace subscriptions</p>

			3(a).			
2. SYSTEMS						
<i>1. Systems overview</i>	Technical services are currently provided by Reuters Canada Limited (Reuters), which administers the CanPX Transparency System, as instructed by CanPX.	Bluesky System LLC currently provides the systems and application software, maintenance and upgrades, as well as systems administration and second level client support.	The data will be collected through CanDeal, which has in place a network between itself and 12 primary dealers, and distributed through TSX's market data distribution platform.	MX will create the SOLA® Canadian Consolidated Market Feed Technology Solution to receive, consolidate, disseminate and manage quote and trade information for fixed income and equity securities.	CDS Inc. proposes to engage a software development firm (Tata Consultancy Services) to create the required system solution and to use CDS Inc. to operate and maintain the resultant system.	The primary system is TSX's RTMD messaging middleware and distribution platform that manages the input, throughput, processing and distribution of data feeds and their related protocols.
<i>2. Development and Implementation</i>						
<i>a. Implementation timeline</i>	The system is currently live.	It estimates that it can provide a production-ready system within 60 to 90 days.	The system is currently "live" in that CanDeal collects data from its dealer contributors and the data is subsequently distributed by TSX.	While the implementation timeline will depend on the final requirements and scope of the IP (i.e. equity, debt or both), it is currently anticipated that the timeline for development and implementation for the	Currently, it is anticipated that the development and implementation timeline will be 18 months, including 12 months for system development work and 6 months for implementation, including community testing and	A timeline for rolling out the feed will be established once specifications are determined.

				system will be 12 months.	readiness.	
3. Connectivity						
<i>a. Connection method</i>	<p><u>Dealers</u> Dealers report via a page or item-based feed in a proprietary protocol. The proprietary feed is transmitted to the CanPX system using redundant communication facilities including dedicated circuits, hardware and transmission points. Several dealers have chosen a File Transfer Protocol (FTP) to transmit data.</p> <p><u>IDBs</u> IDBs transmit proprietary feeds, on a voluntary basis, using redundant communications facilities</p>	<p><u>Participating firms reporting trades on an hourly basis</u> The applicant will implement redundant FTP servers to receive hourly Extensible Markup Language (XML) files.</p> <p><u>Participating firms that will voluntarily report orders or trades on a real-time basis</u> The applicant will determine the most efficient language protocol in consultation with each participating firm.</p>	Data files will be collected by CanDeal using a Secured File Transfer Protocol (SFTP) over the Internet.	Physical access to the system will be achieved by making use of the MX data network linking data centres, numerous points of presence (POP), and through third-party network providers. In addition to direct POP connections and connections through one of several supported third party network providers, connectivity would also be available over the internet, using a VPN connection. The marketplaces providing the source feeds may connect to any of the POPs through direct connections to one of the	The data transmitted will be in the standard industry protocol FIX format. Data will be transmitted via secured Internet transport or SFTP (for smaller firms). CDS Inc. will transform, in real time, the FIX format into a standard format for subsequent processing.	Information from the marketplaces can be transmitted to the IP in any format and will be reformatted if necessary. STAMP is preferred, however TSX can accommodate other formats. Each marketplace will supply data via two identical feeds on dual independent lines to the IP.

	including dedicated circuits, hardware and termination points.			<p>MX POPs, through third party network providers or over the internet.</p> <p>A single, industry wide protocol is envisaged, but the system can be extended to support additional protocols.</p>		
<i>b. Connectivity costs</i>	Internal costs to establish a connection to CanPX are borne by the participating firms.	Each participating firm is responsible for their connectivity costs to transmit data.	The cost to connect to the IP is the responsibility of the participant, and there will not be a mark-up passed along by CanDeal/TSX. There will be no additional costs attributed to the 12 primary dealers currently connected to CanDeal.	Marketplaces, dealers and IDB providing information will pay their own connectivity fees.	<p>CDS Inc. already has existing network connection with all stock exchanges and most bond dealers across Canada, therefore, there are unlikely to be any additional connectivity costs for data providers.</p> <p>However, if a data provider does not have an existing network connection to CDS, such connection can be put in</p>	Each marketplace will be responsible at its own expense for installing, operating and maintaining connectivity lines to the IP.
