to Current (Consolidated) Form 44-101F3**

**National Instrument 44-101
Short Form Prospectus Distributions**

**Form 44-101F31
Short Form Prospectus**

INSTRUCTIONS

- (1) *The objective of the short form prospectus is to provide information concerning the issuer that an investor needs in order to make an informed investment decision. This Form sets out specific disclosure requirements that are in addition to the general requirement under securities legislation to provide full, true and plain disclosure of all material facts relating to and, in Québec, not to make any misrepresentation likely to affect the value or market price of, the securities to be distributed. Certain rules of specific application impose prospectus disclosure obligations in addition to those described in this Form.*
- (2) *Terms used and not defined in this Form that are defined or interpreted in ~~National Instrument NI~~ 44-101 ~~Short Form Prospectus Distributions~~ shall bear that definition or interpretation. Other definitions are set out in National Instrument 14-101 Definitions.*
- (3) *In determining the degree of detail required, a standard of materiality should be applied. Materiality is a matter of judgement in the particular circumstance, and should generally be determined in relation to an item's significance to investors, analysts and other users of information. An item of information, or an aggregate of items, is considered material if it is probable that its omission or misstatement would influence or change an investment decision with respect to the issuer's securities. In determining whether information is material, take into account both quantitative and qualitative factors. The potential significance of items should be considered individually rather than on a net basis, if the items have an offsetting effect. This concept of materiality is consistent with the financial reporting notion of materiality contained in the Handbook.*
- (4) *Unless an item specifically requires disclosure only in the preliminary short form prospectus, the disclosure requirements set out in this Form apply to both the preliminary short form prospectus and the short form prospectus. Details concerning the price and other matters dependent upon or relating to price, such as the number of securities being distributed, may be left out of the preliminary short form prospectus, along with specifics concerning the plan of distribution, to the extent that these matters have not been decided.*

- (5) Any information required in a short form prospectus may be incorporated by reference in the short form prospectus, other than confidential material change reports. Clearly identify in a short form prospectus any document incorporated by reference. If an excerpt of a document is incorporated by reference, clearly identify the excerpt in the short form prospectus by caption and paragraph of the document. Any material incorporated by reference in a short form prospectus is required under sections ~~10.24.2~~ and ~~10.34.3~~ of National Instrument 44-101 to be filed with the short form prospectus unless it has been previously filed.
- (6) The disclosure must be understandable to readers and presented in any easy to read format. The presentation of information should comply with the plain language principles listed in section ~~9.24.2~~ of Companion Policy 44-101CP Short Form Prospectus Distributions. If technical terms are required, clear and concise explanations should be included.
- (7) No reference need be made to inapplicable items and, unless otherwise required in this Form, negative answers to items may be omitted.
- (8) Where the term "issuer" is used, it may be necessary, in order to meet the requirement for full, true and plain disclosure of all material facts, **and in Québec, disclosure of all material facts likely to affect the value or the market price of the securities to be distributed,** to also include disclosure with respect to the issuer's subsidiaries and investees. If it is more likely than not that a person or company will become a subsidiary or investee, it may be necessary to also include disclosure with respect to the person or company.
- (9) An issuer that is a special purpose vehicle ~~entity~~ may have to modify the disclosure items to reflect the special purpose nature of its business.
- (10) If disclosure is required as of a specific date and there has been a material change or change that is otherwise significant in the required information subsequent to that date, present the information as of the date of the change or a date subsequent to the change instead.
- (11) If the term "class" is used in any item to describe securities, the term includes a series of a class.
- (12) Disclosure in a preliminary short form prospectus or short form prospectus must be consistent with National Instrument 51-101 Standards of Disclosure for Oil and Gas Activities if the issuer is engaged in oil and gas activities (as defined in National Instrument 51-101) ~~and~~.

- ~~—— (a) — has filed or is required to have filed (or has included or is required to have included in another filed document) audited annual financial statements for a financial year that ends on or after December 31, 2003;~~

5.9 Constraints

- If there are constraints imposed on the ownership of securities of the issuer to ensure that the issuer has a required level of Canadian ownership, describe the mechanism, if any, by which the level of Canadian ownership of the securities of the issuer will be monitored and maintained.

Item 6 ~~Item 7~~ Earnings Coverage Ratios

6.1 ~~7.1~~ Earnings Coverage Ratios

- (1) If the securities being distributed are debt securities having a term to maturity in excess of one year or are preferred shares, disclose the following earnings coverage ratios adjusted in accordance with paragraph (2):

- (a) 1. — The earnings coverage ratio based on the most recent 12 month period ~~ended on the last day of the most recently completed period for which audited~~ included in the issuer's current annual financial statements of the issuer have been, or are required to have been, filed with any Canadian securities regulatory authority. If there has been a change in year end and the issuer's most recent financial year is less than nine months in length, also disclose the earnings coverage calculation for its old financial year. If the issuer's financial year is less than 12

months in length, the earnings coverage should be calculated on an annualized basis.

(b) 2.—The earnings coverage ratio based on the 12 month period ended on the last day of the most recently completed period for which interim financial statements of the issuer have been, or are required to have been, filed with any Canadian securities regulatory authority, if the period is subsequent to the last day of the most recently completed period for which audited annual financial statements of the issuer have been, or are required to have been, filed with any Canadian securities regulatory authority **incorporated by reference into the short form prospectus.**

(2) Adjust the ratios referred to in paragraph (1) to reflect

(a) the issuance of the securities being distributed under the short form prospectus, based on the price at which these securities are expected to be distributed;

(b) in the case of a distribution of preferred shares,

(i) **the issuance of** all preferred shares issued since the date of the annual or interim financial statements, and

(ii) **the repurchase, redemption or other retirement of** all preferred shares repurchased, redeemed, or otherwise retired since the date of the annual or interim financial statements and **of** all preferred shares to be repurchased, redeemed, or otherwise retired from the proceeds to be realized from the sale of securities under the short form prospectus;

(c) the issuance of all long-term financial liabilities, as defined in accordance with the issuer's GAAP;

as amended January 4, 2005

(d) the repayment, redemption or other retirement of all long-term financial liabilities, as defined in accordance with the issuer's GAAP, since the date of the annual or interim financial statements and all long-term financial liabilities to be repaid or redeemed from the proceeds to be realized from the sale of securities distributed under the short form prospectus; and

as amended January 4, 2005

(e) the servicing costs that were incurred, or are expected to be incurred, in relation to the adjustments.

- (3) If the issuer is distributing, or has outstanding, debt securities that are accounted for, in whole or in part, as equity, disclose in notes to the ratios required under paragraph (1)
- (a) that the ratios have been calculated excluding the carrying charges for those securities that have been reflected in equity in the calculation of the issuer's interest and dividend obligations;
 - (b) that if those securities had been accounted for in their entirety as debt for the purpose of calculating the ratios required under paragraph (1), the entire amount of the annual carrying charges for those securities would have been reflected in the calculation of the issuer's interest and dividend obligations; and
 - (c) the earnings coverage ratios for the periods referred to in paragraph (1), calculated as though those securities had been accounted for as debt.

as amended January 4, 2005

- (4) If the earnings coverage ratio is less than one-to-one, disclose in the prospectus the dollar amount of the earnings required to achieve a ratio of one-to-one.**
- (5) If the short form prospectus includes a pro forma income statement, calculate the pro forma earnings coverage ratio and disclose it in the prospectus.**

INSTRUCTIONS

- (1) *Cash flow coverage may be disclosed but only as a supplement to earnings coverage and only if the method of calculation is fully disclosed.*
- (2) *Earnings coverage is calculated by dividing an entity's earnings (the numerator) by its interest and dividend obligations (the denominator).*
- ~~(23)~~ *For the earnings coverage calculation*
- (a) *the numerator should be calculated using consolidated net income before interest and income taxes;*
 - (b) *imputed interest income from the proceeds of a distribution should not be added to the numerator;*
 - (c) *an issuer may also present, as supplementary disclosure, a coverage calculation based on earnings before discontinued operations and extraordinary items;*

(d) *for distributions of debt securities, the appropriate denominator is interest expense determined in accordance with the issuer's GAAP, after giving effect to the new debt issue and any retirement of obligations, plus the amount of interest that has been capitalized during the period;*

as amended January 4, 2005

(e) *for distributions of preferred shares*

(i) *the appropriate denominator is dividends declared during the period, together with undeclared dividends on cumulative preferred shares, after giving effect to the new preferred share issue, plus the issuer's annual interest requirements, including the amount of interest that has been capitalized during the period, less any retirement of obligations, and*

(ii) ~~*the coverage calculation should gross up dividends*~~ **should be grossed-up** *to a before-tax equivalent (the "prior deduction method") using the issuer's effective income tax rate (the rate that is reconciled to the basic income tax rate in the issuer's financial statement notes), and (iii) — the combined interest and dividend method (the "combined method"), and not the prior deduction method, should be used to calculate earnings coverage; and*

(f) *for distributions of both debt securities and preferred shares, the appropriate denominator is the same as for a preferred share issue, except that the denominator should also reflect the effect of the debt being offered pursuant to the short form prospectus.*

~~(3) — The prior deduction method referred to in Instruction 2(e)(ii) reflects the net coverage for preferred dividends after meeting interest obligations and results in a higher ratio than the combined method. As investors may falsely interpret the higher ratio as indicating less risk, without appreciating the fact that debtholders rank before preferred shareholders, the combined method should be used, although disclosure of a supplementary coverage ratio calculated using the prior deduction method is permitted.~~

(4) *The denominator represents a pro forma calculation of the aggregate of an issuer's interest obligations on all long-term debt and dividend obligations (including both dividends declared and undeclared dividends*

on cumulative preferred shares) with respect to all outstanding preferred shares, as adjusted to reflect

- (a) *the issuance of all long-term debt and, in addition in the case of an issuance of preferred shares, all preferred shares issued, since the date of the annual or interim financial statements;*
 - (b) *the issuance of the securities that are to be distributed under the short form prospectus, based on a reasonable estimate of the price at which these securities will be distributed;*
 - (c) *the repayment or redemption of all long-term debt since the date of the annual or interim financial statements, all long-term debt to be repaid or redeemed from the proceeds to be realized from the sale of securities under the short form prospectus and, in addition, in the case of an issuance of preferred shares, all preferred shares repaid or redeemed since the date of the annual or interim financial statements and all preferred shares to be repaid or redeemed from the proceeds to be realized from the sale of securities under the short form prospectus; and*
 - (d) *the servicing costs that were incurred, or will be incurred, in relation to the above adjustments.*
- (5) *If meaningful in the circumstances, the earnings coverage ratio must be calculated and disclosed based on a pro forma income statement that is included in a short form prospectus. In certain circumstances, debt obligations may be classified as current liabilities because such obligations, by their terms, are due on demand, are due within one year, or are callable by the creditor. If the issuer is distributing, or has outstanding, debt securities that are classified as current liabilities, disclose*
- (a) in the notes to the ratios required under subsection 6.1(1) that the ratios have been calculated excluding the carrying charges for those debt securities reflected as current liabilities;*
 - (b) that if those debt securities had been classified in their entirety as long term debt for the purposes of calculating the ratios under Item 6.1(1), the entire amount of the annual carrying charges for such debt securities would have been reflected in the calculation of the issuer's interest and dividend obligations; and*
 - (c) the earnings coverage ratios for the periods referred to in Item 6.1(1), calculated as though those debt securities had been classified as long term debt.*

- (6) For debt securities, disclosure of earnings coverage shall include language similar to the following:

"~~The Company~~'Name of the issuer's interest requirements, after giving effect to the issue of [the debt securities to be distributed under the short form prospectus], amounted to \$• for the 12 months ended •. ~~The Company~~'Name of the issuer's earnings before interest and income tax for the 12 months then ended was \$•, which is • times name of the Company issuer's interest requirements for this period."

- (7) For preferred share issues, disclosure of earnings coverage shall include language similar to the following:

"~~The Company~~'Name of the issuer's dividend requirements on all of its preferred shares, after giving effect to the issue of [the preferred shares to be distributed under the short form prospectus], and adjusted to a before-tax equivalent using an effective income tax rate of •%, amounted to \$• for the 12 months ended •. ~~The Company~~'Name of the issuer's interest requirements for the 12 months then ended amounted to \$•. ~~The Company~~'Name of the issuer's earnings before interest and income tax for the 12 months ended • was \$•, which is • times name of the Company issuer's aggregate dividend and interest requirements for this period."

- (8) ~~If the issuer is a wholly owned subsidiary of a credit supporter, has no operations or only minimal operations, that are independent of the credit supporter and is an entity that functions essentially as a special purpose vehicle, disclose the earnings coverage of the credit supporter. If this disclosure is included, the earnings coverage of the issuer may not be material and, if not material, may be omitted. If the issuer is a wholly owned subsidiary of the credit supporter but has more than minimal operations that are independent of the credit supporter, or if the issuer is not a wholly owned subsidiary of the credit supporter, the earnings coverage of both the credit supporter and the issuer shall be disclosed.~~

- (9) ~~If the earnings coverage is less than one to one, disclose this fact in bold-face on the cover page of the short form prospectus. While the actual coverage ratio should not be disclosed in these circumstances, the dollar amount of the coverage deficiency (i.e., the dollar amount of earnings required to attain a ratio of one to one) should be disclosed in the body of the short form prospectus.~~(10) ~~Other earnings coverage calculations may be included as supplementary disclosure to the required earnings coverage calculations outlined above as long as their derivation~~

is disclosed and they are not given greater prominence than the required earnings coverage calculations.
