Item 10: RISK FACTORS

10.1 General Risks

There are certain risks inherent in an investment in the Class A Common Shares and in the activities of the issuer, which investors should carefully consider before investing in the Class A Common Shares. The following is a summary only of some of the risk factors. Prospective purchasers should review the risks relating to an investment in the Class A Common Shares with their legal and financial advisors.

The issuer advises that prospective purchasers should consult with their own independent professional legal, tax, investment and financial advisors before purchasing the Class A Common Shares in order to determine the appropriateness of this investment in relation to their financial and investment objectives and in relation to the tax consequences of any such investment.

In addition to the factors set forth elsewhere in this Offering Document, prospective purchasers should consider the following risks before purchasing the Class A Common Shares. Any or all of these risks, or other as yet unidentified risks, may have a material adverse effect on the issuer's business, and/or the return to the purchasers.

10.2 Investment Risk

- a) ***Securities are Speculative*** - The securities offered hereunder must be considered highly speculative and an investment in such securities involves a high degree of risk. A potential subscriber should carefully consider the following risk factors in addition to the other information contained in this memorandum before purchasing Class A Common Shares and any underlying shares into which such Class A Common Shares (collectively, the "Securities"). Due to the nature of the business and the present stage of development of its business, the issuer may be subject to significant risks. The issuer's actual operating results may be very different from those expected as at the date of this memorandum, in which the event the trading price of the Securities could decline, and a subscriber may lose all or part of his or her investment. The risk factors outlined below are not a definitive list of all risk factors associated with an investment in the Securities offered hereunder and investors are cautioned that they may lose their entire investment.
2. ***Restrictions on Transfers; No Public Market*** - There is presently no public market for the Securities and none is expected to develop in the foreseeable future. The Securities are subject to substantial restrictions on transfer under securities laws and the Articles of the issuer. Accordingly, the Securities may not be resold or otherwise transferred, except in accordance with the Articles of the issuer or in accordance with such applicable Canadian securities laws. (See Item 12 – Resale Restrictions.)
3. ***Value of Securities of the issuer*** - The price for Securities of the issuer is determined by management and may not bear any relationship to earnings, book value or other valuation criteria.
4. ***Tax Matters*** - The return on a shareholder's investment in his/her or its Securities is subject to changes in Canadian Federal and Provincial tax laws, as well as any other tax laws applicable to the shareholders. There can be no assurance that the tax laws will not be changed in a manner which will fundamentally alter the tax consequences to investors of holding or disposing of Securities.
5. ***Dilution*** - After completion of the Offering, then existing shareholders may have their interests diluted. The exercising of outstanding stock options or warrants shall also have a dilutive effect on the interests of the new purchasers of the Securities. Moreover, in the event the issuer requires

additional equity financing pursuant to the Securities offered under the Offering, purchasers of the additional Securities may experience further dilution to the extent that such Securities may be issued for a value less than the price paid for conversion of shares acquired hereunder.

10.3 **Issuer Risks**

- a) **No assurance** - There is no guarantee that the issuer will achieve its investment objective or earn a positive return.
- b) **Management and Personnel Risks** - The issuer's business will be significantly dependent on the issuer's management team including outside management advisors and consultants. The loss of the issuer's officers, other employees, advisors or consultants could have a material adverse effect on the issuer. The issuer's success depends, in part, on its ability to attract and retain key, technical, management and operating personnel, including consultants and members of the issuer's Board. The issuer needs to develop sufficient expertise and add skilled employees or retain consultants in areas such as research and development, sales, and marketing in order to successfully execute its business plan. The issuer may be unable to attract and retain qualified personnel or develop the expertise needed in these areas. If the issuer fails to attract and retain key personnel it may be unable to execute its business plan and its business could be adversely affected. As of the date of this offering, The issuer does not maintain key man insurance on any member of its management.
- c) **No History of Dividends or Plan to Pay Dividends** - The issuer has never paid a dividend nor made a distribution on any of their securities. Further, the issuer may never achieve a level of profitability that would permit payment of dividends or other forms of distribution to its shareholders. Given the stage of the issuer's business, it will likely be a long period before the issuer could be in a position to declare dividends or make distributions to its investors. The payment of any future dividends by the issuer will be at the sole discretion of the issuer's management. Holders of shares (including any shares issued upon conversion of the Class A Common Shares) will be entitled to receive dividends only when, as, and if, declared by the issuer's Board.
- d) **Inability to Manage the Potential Growth of the Business** - The issuer may be subject to growth-related risks including capacity constraints and pressure on its internal systems and controls. The ability of the issuer to manage growth effectively will require it to continue to implement and improve its operations and financial systems and to expand, train, and manage its employee base. The inability of the issuer to deal with potential growth could have a material adverse impact on its business, operating results, financial condition or profitability. Any expansion of operations the issuer may undertake will entail risks; such actions may involve specific operational activities, which may negatively impact the profitability of the issuer.

Consequently, shareholders must assume the risk that (i) such expansion may ultimately involve expenditures of funds beyond the resources available to the issuer at that time, and (ii) management of such expanded operations may divert management's attention and resources away from any other operations, all of which factors may have a material adverse effect on the issuer's present and prospective business activities.

- e) ***Further Need for Debt or Equity Financing*** - The issuer may have to sell additional securities including, but not limited to, shares or some form of convertible security, the effect of which will result in a dilution of the equity interests of any existing shareholders. The issuer may also need to raise capital by incurring long term or short-term indebtedness in order to fund its business objectives. This could result in increased interest expense or decreased net income. Security holders are cautioned that there can be no assurance as to the terms of such financing and whether such financing will be available. Moreover, the issuer's articles do not limit the amount of indebtedness that the issuer may incur. The level of the issuer's indebtedness could impair its ability to obtain additional financing in the future on a timely basis to take advantage of business opportunities that may arise.
- f) ***Development Stage of Business Risks*** - The issuer has only a limited history upon which an evaluation of its prospects and future performance can be made. The issuer's proposed operations are subject to all business risks associated with new enterprises. The likelihood of the issuer's success must be considered in light of the problems, expenses, difficulties, complications and delays frequently encountered in connection with the expansion of a business, operation in a competitive industry and the development of a customer base. There is a possibility that the issuer could sustain losses into the future. If the issuer is unable to generate revenues or profits, investors might not be able to realize returns on their investment or prevent the loss of their investment.
- g) ***Forward-Looking Statements and Information May Prove Inaccurate*** - Investors are cautioned not to place undue reliance on forward-looking statements and information. By its nature, forward-looking statements and information involves numerous assumptions, known and unknown risks and uncertainties, of both a general and specific nature, that could cause actual results to differ materially from those suggested by the forward-looking statements and information or contribute to the possibility that predictions, forecasts, or projections will prove to be materially inaccurate.
- h) ***Competition Risks*** - If the issuer fails to compete effectively against larger, more established companies with greater resources, then its business may suffer. There can be no assurance that the issuer's current or future products or services and the results of the issuer's ongoing research and development efforts will result in products or services that will be viable for any commercial applications and, if viable, that potential customers will utilize the issuer's products and services

for the purposes intended. Increased competition may result in price reductions, reduced gross margins and loss of market share, any of which could materially and adversely affect the issuer's business. The issuer may not be able to compete successfully against current and future competitors and the failure to do so would harm the issuer's business.

- i) **Cyber security risk** - Cyber security risk is the risk of loss and liability to an organization resulting from a failure or breach of the information technology systems used by or on behalf of the organization and its service providers, including incidents resulting in unauthorized access, use or disclosure of sensitive, regulated or protected data. The use of the internet and information technology systems by the issuer and their service providers may expose the issuer to potential loss or liability arising from cyber security incidents.
- j) **Litigation risk** - The issuer may be subject to litigation arising out of its operations. Damages claimed under such litigation may be material, and the outcome of such litigation may materially impact the issuer's respective operations, and the value of the shares. While the issuer will assess the merits of any lawsuits and defend such lawsuits accordingly, the issuer may be required to incur significant expense or devote significant financial resources to such defenses. In addition, the adverse publicity surrounding such claims may have a material adverse effect on the issuer's operations.
- k) **Inability to License Other Intellectual Property Rights** - The technology of the issuer may require the use of other existing technologies and processes, which are currently, or in the future, will be, subject to patents, copyrights, trademarks, trade secrets or other intellectual property rights held by other parties, in which case the issuer will need to obtain one or more licenses to use those other technologies. If the issuer is unable to obtain licenses, on reasonable commercial terms, from the holders of such other intellectual property rights, it could be required to halt development and manufacturing or redesign its technology, failing which it could bear a substantial risk of litigation for misuse of the other technologies. In any such event, the business and operations of the issuer could be materially adversely affected.
- l) **General Economic Conditions** - The financial success of the issuer may be sensitive to adverse changes in general economic conditions in Canada, such as war, terrorist attacks, recession, inflation, labour disputes, demographic changes, weather or climate changes, unemployment and interest rates. There is no assurance that the issuer will be successful in marketing any of its products, or that the revenues from the sale of such products will be significant. Consequently, the issuer's revenues may vary by quarter, and the issuer's operating results may experience fluctuations.
- m) **Management Discretion as to Application of Proceeds** - The net proceeds from this Offering will be used for the purposes described under "Item 7: USE OF FUNDS". The issuer reserves the

right to use the funds obtained from this Offering for any general business purposes and such other purposes not presently contemplated which it deems to be in the best interests of the issuer and its shareholders. As a result of the foregoing, the success of the issuer may be substantially dependent upon the discretion and judgment of the issuer's management with respect to application and allocation of the net proceeds of the Offering. Investors will be entrusting their funds to the issuer's management, upon whose judgment and discretion, the investors must depend.

Item 11: REPORTING OBLIGATIONS

11.1 The issuer is not a "reporting issuer" in any jurisdiction in Canada. As a corporation formed under the *Business Corporations Act* (British Columbia), subject to the terms of the Voting Trust Agreement described above, the issuer is required to provide shareholders with financial statements and any further information respecting to the financial position of the corporation and the results of its operations as may be required by the *Business Corporations Act* (British Columbia).

Item 12: RESALE RESTRICTIONS

12.1 **The securities you are purchasing are subject to a resale restriction. You may never be able to resell the securities.**

Item 13: PURCHASERS' RIGHTS

13.1 **If you purchase these securities, your rights may be limited and you will not have the same rights that are attached to a prospectus under applicable securities legislation. For information about your rights you should consult a lawyer.**

You can cancel your agreement to purchase these securities. To do so, you must send a notice to the funding portal within 48 hours of your subscription. If there is an amendment to this offering document, you can cancel your agreement to purchase these securities by sending a notice to the funding portal within 48 hours of receiving notice of the amendment.

The offering of securities described in this offering document is made pursuant to a start-up crowdfunding registration and prospectus exemptions order issued by the securities regulatory authority or regulator in each participating jurisdiction exempting the issuer from the prospectus requirement.
